

AUTHORS' GUIDELINES

EPJST special issue

“The use of radiation in science and technology”

Guest editors: Aleksandar Jaksic, Christos Tsabaris, Jugoslav Karamarkovic

Please submit your manuscript **through the portal**: <https://www.editorialmanager.com/epjs/>

Submission deadline is 31 August 2025.

Submission Guidelines (Instructions for Authors) are available at:
<https://www.springer.com/journal/11734/submission-guidelines>.

The **LaTeX macros** for the preparation of the manuscripts can be found at
<https://www.springernature.com/gp/authors/campaigns/latex-author-support>.

Authors are free to use other formats, such as Word (**Word template** is available [here](#)).

Please note that the **journal particularly encourages submission of Original Paper (v1)** manuscript category, which is typically 5-10 pages long (please see more details in Submission Guidelines, under “Article Categories”).

During submission, please specify that the paper is intended for the special issue “The use of radiation in science and technology” in Additional Information:

Authors should be aware that if the CORRESPONDING author is affiliated to an institute that has an Open Access (OA) agreement with Springer, the OA publication - if verified - is paid by the agreement partner. Under the following [link](#) all agreements are listed with more details under TRANSFORMATIVE AGREEMENTS. Eligibility will be automatically verified when the corresponding author is requested to complete the relevant affiliation information after acceptance of the paper during the production process. Corresponding authors not affiliated to institutes with Open Access Agreements are redirected to proceed with “Please select your publishing model” and have to decide between paying the current [Open Access fee](#) or choosing the subscription option without any publication charges. Alternatively, co-authors may jointly investigate if a change of corresponding author would make their paper eligible for institutional OA (in such a case more than one corresponding author is possible but the main corresponding author must be affiliated to an institute with a Transformative Agreement).
